

# Learn Web Design

---

progress update from Not Devs

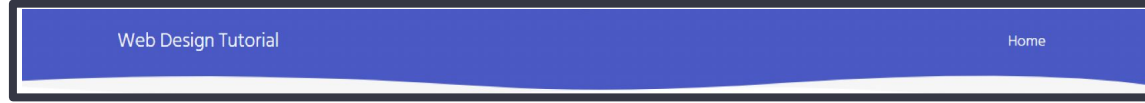

# We are Not Devs!

- Laureen Nsoh-Awasom
- Saurav Pawar
- Zach Halderwood

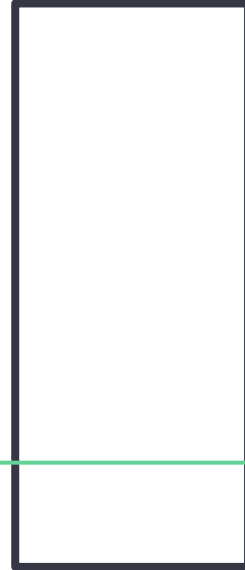

# Site map (WIP)

- *Homepage*
  - *Human-Computer Interaction & Web Design*
    - *Understanding user interfaces*
    - *Elements of a good design*
  - *Learn the Languages of Web Development*
    - *HTML*
    - *CSS*
    - *Javascript*
  - *What tools are needed to design a website?*
    - *IDEs*
    - *Web browsers*
    - *Website testing* (browser compatibility, mostly)
  - *Creators page*
    - *Picture, short bio, social media/personal site links*
  - *References & Extended Learning*
    - *list of references and additional resources, including but not limited to:*
      - <https://developer.mozilla.org/en-US/docs/Learn>
      - <https://www.w3schools.com/>
      - etc

# Homepage visual map (WIP)

Header will act as primary navigation tool, containing homepage link and links to top-level pages on the site

Side nav bar will have suggested articles from this site. Could also be used for ads if the site was to be published and monetized.

Main article for the current page with title, section headings, and visual aids as relevant

# More about HCI & web design articles

- This section of the site will be derived largely from what we've learned in this class so far, including:
  - What is HCI?
  - What is user interface?
  - What makes a good user interface?
  - What your design needs to take into account
  - Consider the fact that users judged designs quickly and take into account usability and likeability.

# And the other articles on the site

- Languages, IDEs, browsers, etc
  - Knowledge base will be sourced by us and flushed out with info gathered from properly credited external sources
- Contact page and references
  - pretty self explanatory

Thanks for your attention!

---
